

October 10, 2025: On Elon is Dons Extortion Hound

Be honest! **How can a man that has taken 38 BILLION DOLLARS IN TAXPAYER FUNDS have any right at all to go sifting through government agencies to find ways that THEY CAN SPEND LESS TAX DOLLARS? WHAT KIND OF UPSIDE DOWN LOGIC WOULD EVER APPROVE OF SUCH A CHARADE?**

◆ AI Overview

As of early 2025, Elon Musk's companies, including SpaceX, Tesla, and xAI, have received an estimated \$38 billion or more in U.S. government support through various contracts, loans, subsidies, and tax credits. The payments, which have occurred over two decades, helped fund the growth of Musk's business empire.

Government funding and contracts by company

SpaceX

WHY DOES ONE MAN

The aerospace company is the biggest recipient of government funding and has multiple contracts with U.S. agencies.

RECEIVE ALL

- **NASA:** SpaceX receives billions to transport crew and cargo to the International Space Station (ISS) and to develop a lunar lander for the Artemis program. Recent contracts also cover the development of a vehicle to deorbit the ISS in 2030, valued at up to \$843 million.

OF THESE CONTRACTS?

- **Department of Defense (DoD) and Space Force:** SpaceX has billions in contracts to launch national security satellites into orbit.
- **Classified contracts:** Reuters and *The Wall Street Journal* have reported on classified contracts, including a potential \$1.8 billion deal with the National Reconnaissance Office (NRO) to build a satellite network.

Tesla

ONE REASON: SECRECY.

While Tesla does not receive direct government contracts, it benefits from government-backed subsidies and incentives.

- **Regulatory credits:** Under federal and state laws, Tesla earns credits for producing zero-emission vehicles, which it sells to other automakers. Tesla's profits from these credits reached \$11.4 billion between 2014 and 2025.
